Education

M.S. in Bioinformatics, Newcastle University, Newcastle upon Tyne, UK 2017–2018

Disctinction

Dissertation: Evaluation of machine learning strategies for classification and unbiased discovery of the new cell types in the single cell RNA-seq datasets

Advisors:

— Jaume Bacardit, Reader at Newcastle University;

— Alexander Misharin, Assistant Professor at Northwestern University.

Undergraduate coursework in Biology, Moscow State University, Moscow, Russia 2003–2006

Genetics major

A spatially restricted fibrotic niche in pulmonary fibrosis is sustained by M-CSF/M-CSFR signalling in monocyte-derived alveolar macrophages. *European Respiratory Journal*, 2020; 55 (1) 1900646. https://doi.org/10.1183/13993003.00646-2019

Invited talks

Circuits between infected macrophages and T cells in SARS-CoV-2 pneumonia — June 2021
American Thoracic Society Allergy, Immunology and Inflammation (AII) assembly journal club. Recording

Work Experience

Post-Baccalaureate Research Fellow, Division of Pulmonary and Critical Care, Feinberg School of Medicine, Northwestern University, Chicago, USA — 2019–present
Analyse transcriptomic data from human samples and mouse experiments to gain insights into COVID-19, pulmonary fibrosis, systemic sclerosis and other pulmonary diseases. Write manuscripts, support and organize data exchange, data management infrastructure, survey and apply new tools to RNA-seq analysis, develop in-house algorithms, design biological experiments to test hypothesis generated from analysis of transcriptomic data.

Head of maintenance tools development group, Yandex, Moscow, Russia — 2014–2017
Develop, design and support web-services and console tools for system administrators and other employees. Manage a team of developers on these projects: mentor, resolve conflicts, improve performance, code review.

Full-stack software engineer, Yandex, Moscow, Russia — 2007–2014
Develop, design and support web-services and console tools for automating and improving employees' workflows.

Software engineer, Art. Lebedev Studio, Moscow, Russia — 2006–2007
Develop and support web-sites and content management system.

Teaching Experience

Summer Students Program 2020 at Division of Pulmonary and Critical Care — 2020
Oversaw a group of 4 college students on a bioinformatics project of analysis of single-cell bronchial brushing samples in a remote setting during the 4-week

Summer Students Program. Contributed to project's design, teaching R programming environment, single-cell RNA-seq experimental technology, single-cell analysis software (Seurat), mentoring and troubleshooting.

Introduction to Python, Introduction to Pandas and Matplotlib 2020
Small introductory lecture series during Data Science Nights at NICO, Northwestern University.

Introduction to Programming, Newcastle University, Newcastle upon Tyne, UK 2017
Unofficial 5-lecture course for fellow students.

Introduction to Computer Science with Python 3, Yandex, Moscow, Russia 2013
High-school students.

Coursework

DGP 440 Immunology, Northwestern University 2020
Auditioned the course

Evaluation of machine learning strategies for classification and unbiased discovery of the new cell types in the single cell RNA-seq datasets 2018
M.S. thesis, Newcastle University.
Advisers:
— Jaume Bacardit, Reader at Newcastle University;
— Alexander Misharin, Assistant Professor at Northwestern University.

We evaluated the possibility of using machine learning methods to rapidly annotate new single cell RNA-seq datasets based on the reference dataset. We assessed the performance of a gradient boosting algorithm `catboost` for predicting cell types in Mouse Cell Atlas dataset and 3 samples of mouse lungs. We explored several strategies to explicitly train our models to detect novel cell types that are absent in the reference dataset. `Catboost` showed good performance, and was able to detect novel cell types while retaining good quality of cell type predictions. This demonstrated the possibility to use machine learning classification for unbiased high-throughput cell type discovery.

Miscalleneous

Contributions to single-cell RNA-seq open-source tools `Seurat` and `CellBrowser`, bioinformatics tool `biopython` 2018–present

Dataset visualisation for Reyfman *et al.*, 2019 for Northwestern University 2018
Create a website with interactive dataset visualisation for single-cell RNA-seq lung datasets from Reyfman *et al.*, 2019 using open-source tools.

Lab system administrator, Polilov lab, Moscow State University, Moscow, Russia 2017–2019
Install and maintain software for connectome proofreading from Janelia Institute. Setup file sharing and backup for lab members.

Programming languages

Python, R, Java, C++, Ruby, Perl. Linux. Latex. HTML, JS.
