

Machine learning scientist in biomedical field with expertise in developing and applying advanced ML models to multimodal healthcare data. Skilled in building predictive algorithms using clinical, transcriptomic, and imaging data to derive actionable insights that improve patient outcomes, and propose new therapies. Experienced in communicating complex technical findings to diverse stakeholders while collaborating across interdisciplinary teams.

## Technical expertise

- **Machine learning**  
Deep learning frameworks (torch, jax), large language models, multimodal fusion, embedding representations, bayesian modeling
- **Software & tools**  
Python, R, SQL, Linux, computational clusters, interactive visualizations, pipelines
- **Healthcare data**  
Electronic health records (EHR), clinical notes analysis, single-cell RNA-seq, spatial transcriptomics, imaging data, statistics
- **Leadership**  
Cross-functional collaboration, project management, team management, mentorship, scientific communication

## Work experience

- Ph.D. researcher**, Division of Pulmonary and Critical Care Medicine, Feinberg School of Medicine, Northwestern University, Chicago, USA 2022–present
- Developed machine learning models integrating EHR and RNA-seq data to predict patient outcomes from severe pneumonia
  - Created interpretable ML algorithms to identify key molecular features across multiple data modalities
  - Acquired external funding for the project through competitive AHA predoctoral fellowship
  - Consulted Northwestern students and faculty on deep learning, data science and data visualization
  - Presented and published our research in 3 peer-reviewed papers
- Post-baccalaureate research fellow, bioinformatics**, Division of Pulmonary and Critical Care Medicine, Feinberg School of Medicine, Northwestern University, Chicago, USA 2019–2022
- Built and deployed machine learning pipelines for integrated analysis of high-dimensional transcriptomic data
  - Engineered feature extraction algorithms for clinical EHR data to identify patient outcome predictors
  - Developed interactive visualization tools to present complex analysis results to clinical teams
  - Maintained data processing infrastructure for sensitive healthcare data across multiple research teams
- Head of maintenance tools development group**, Yandex, Moscow, Russia 2014–2017
- Managed a team of 6 engineers: hiring, mentoring, resolving conflicts, improving performance
  - Developed, designed and supported tools for system administrators and other employees
- Full-stack software engineer**, Yandex, Moscow, Russia 2007–2014
- Identified employees' workflows bottlenecks for automation
  - Developed, designed and supported web-services and console tools for system administrators and other employees
- Software engineer**, Art. Lebedev Studio, Moscow, Russia 2006–2007
- Developed and supported web-sites and a content management system

## Key publications

## Education

- Ph.D. in Computational Biology**, Northwestern University, Chicago, USA 2022–2025 (anticipated in June)  
Driskill Graduate Program in Life Sciences
- M.S. in Bioinformatics**, Newcastle University, Newcastle upon Tyne, UK 2017–2018  
*With distinction*
- Undergraduate coursework in Biology, Genetics, Moscow State University, Moscow, Russia 2003–2006
